Design Sites

[Planet Photoshop](#)

[Animate 2D in 3D](#) Video Tutorial

Corey shows you how to create a 3D animation from 2D elements using Photoshop CS4 Extended. Click here to [download a .MOV file](#) with the final version of this animation. [Continue Reading »](#)

February 5th, 2010 | [Corey Barker](#) | [Effects](#), [Tutorials](#)

[Digital Photography Review](#)

[Smashing Magazine](#)

[Lynda.com](#)

[i love typography](#)

What would a designer be without fonts? Whenever I need help with type, I head to i love typography, an inviting blog that covers all aspects of the subject. How-tos include making fonts and choosing fonts; there's coverage of the [Arial vs. Helvetica](#) controversy. The site's links are deep and complete, with connections to plenty of font-centric resources and sites where you can download and buy fonts. The fresh, clean layout and well-rounded perspective keep it continually interesting and accessible.
