

SBISD TECHNOLOGY APPLICATIONS
ADOBE CS4 Resources for Secondary Technology Applications
P. Kougar-Melton SBISD Lead TA Teacher/SWHS Digital Media

Lawyers. Accountants. Computer programmers. That's what our parents encouraged us to become when we grew up. But Mom and Dad were wrong. The future belongs to a very different kind of person with a very different mind.

The era of "left brain" dominance, and the information Age that it engendered, are giving way to a new world in which "right brain" qualities-inventiveness, empathy, meaning-predominate. That's the argument at the center of this provocative and original book, which uses the two sides of our brains as a metaphor for understanding the contours of our times.

In A Whole New Mind, which has been translated into 18 languages, Daniel Pink offers a new look at what it takes to excel. This book reveals the six essential aptitudes on which professional success and personal fulfillment now depend, and includes a series of hands-on exercises gained from experts around the world to help readers sharpen the necessary abilities. This book changes not only how we see the world but how we experience it.

Enjoy this enlightening read. Thanks to Sheri Alford for our copies.

**WELCOME TO THE 2009-2010 School Year and enjoy your new beginnings:
